Github and Github Desktop

Getting Started Instructions

Step 1: Downloading and Installing GitHub Desktop

1. Go to the GitHub Desktop website:

 Open a web browser and visit the official GitHub Desktop download page: https://desktop.github.com.

2. Download GitHub Desktop:

- For Windows: Click the Download for Windows button.
- For macOS: Click the Download for macOS button.

3. Install GitHub Desktop:

o For Windows:

- After downloading, double-click the .exe file to launch the installer.
- Follow the installation prompts to complete the setup. No additional configurations are needed during the installation.
- Once installed, GitHub Desktop will open automatically.

o For macOS:

- Open the downloaded .dmg file.
- In the window that appears, drag the GitHub Desktop icon into the Applications folder.
- Open the Applications folder, find GitHub Desktop, and double-click to launch it.

Step 2: Signing Up for a GitHub Account

1. Go to the GitHub website:

o Open a web browser and visit the GitHub signup page: https://github.com.

2. Sign Up for a New GitHub Account:

- Click the Sign up button in the upper right corner of the page.
- Enter the following information:
 - **Username**: Create a unique GitHub username.
 - **Email Address**: Enter your email address (this will be tied to your Git activity).
 - Password: Create a strong password.
- Click Create account and follow the on-screen instructions.

3. Verify Your Email Address:

- After creating your account, GitHub will send a verification email to the address you provided.
- Check your inbox, find the email, and click the verification link to confirm your email.

4. Set Up Multi-Factor Authentication (MFA):

- For security, GitHub may require setting up multi-factor authentication (2FA).
- You can choose to enable 2FA using:
 - Authenticator App: Download an app like Google Authenticator or Duo Mobile, and scan the QR code provided by GitHub.
 - SMS (Text Message): If you prefer, GitHub also supports 2FA via SMS.

Step 3: Logging Into GitHub Desktop

1. Open GitHub Desktop:

Launch GitHub Desktop on your computer.

2. Sign In to GitHub:

 On the first launch, GitHub Desktop will ask you to sign in to your GitHub account.

- o Select **Sign in with your browser**.
- o This will open your default browser and redirect you to GitHub's login page.
- o Enter your GitHub credentials and click **Authorize GitHub Desktop**.

3. Link GitHub Desktop with GitHub:

 After logging in, you will be redirected back to GitHub Desktop, and your account will be successfully linked.
